Omar:

Please review this and make any comments. This is what I understand that you guys are thinking. We need to get this lined out pretty quickly. I am also going to send this to Susan to get her input on this as well so obviously consider this a draft. This will be something we can talk about with Monica.

Actions:

- **PRP: The below actions can be transitioned at an appropriate time if a PRP group can be identified that can do the work required:**
- **EPA (Removal Program): Conduct up to \$2 million worth of cleanup activities on the site which will focus primarily on:**
 - **Disposal of chemical containers and chemical wastes on the facility;**
 - **Clean asphalt/concrete of chemical contamination;**
 - **Remove/Dispose of visible contamination on soils;**
- **TCEQ (Removal Program):**
 - **Complete any of the tasks listed above for which EPA may not be able to complete due to statutory funding or time limitations. The TCEQ has committed to spend \$500,000 to address the Removal Priorities listed above;**
- **TCEQ/EPA Remedial**
 - **TCEQ (thru EPA Cooperative Agreement) will investigate onsite and offsite soils for the purposes of State/Federal Superfund Ranking purposes (PA/SI/ESI);**
 - **TCEQ will take immediate action as warranted to do a more thorough investigation and cleanup if significant issues are identified in the PA/SI/ESI;**
 - **TCEQ/EPA will rank the site if their respective ranking criteria are met;**
 - **TCEQ/EPA: The Site will be addressed further following State/Federal Superfund Process. Note: Should the site be proposed to the NPL, additional funding may be made available for continued EPA removal actions as appropriate.**
